

Cortex-M Internal flash programmer FP-10

Computex®

One-push operation!

Ideal for mass production sites!

Easy target connection!

One touch connection using the standard connector. Space saving connection with custom connection - minimum of 2 pins (*)

- * : In case of SWD interface (excluding GND and power supply)
- * : Depends on the CPU

Straightforward result notification!

Write result notification using 2 color LED(OK/NG) and buzzer - simple and uncomplicated.

Supply power to the target!

Eliminate the need for a separate target power supply, supply power directly from FP-10.

Easy to prepare! Easy to write!

Download write data from host PC to FP-10

Connect FP-10 to the target board and press the PROGRAM button.

Result will be reported by the 2 color LED and the buzzer.

Versatile for Cortex-M core!

Supports writing over 2,500 Cortex-M series core CPU internal flash memory!

Set Protect/security easily!

Easy processing of Protect/security of internal flash memory after write

Dual Interface type support!

Use JTAG or SWD interface to connect the target.

Ultra fast write support!

Write to 512KB Flash memory in under few seconds at Ultra high speeds.

(Note: Write speed varies depending on CPU)

Target power supply function (improve efficiency by reducing target setting up time)

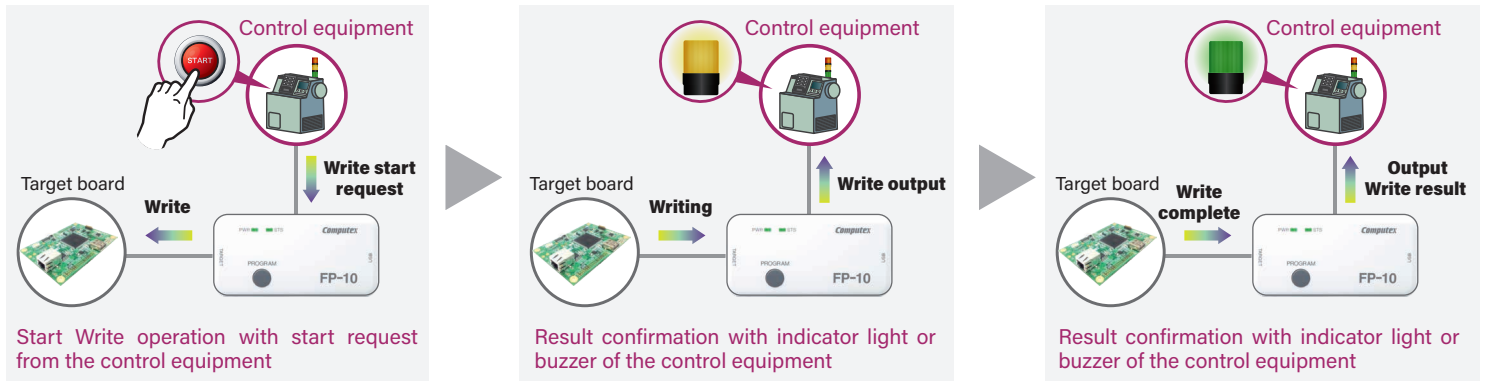

Connection Power can be supplied from FP-10 eliminating the need for external power supply to the target
 (Voltage: 3.3V or 5V, Max 200mA)

Push button!

Control FP-10 from an external control equipment

Main Specification

Supported manufacturers (As of 2018/6)	<ul style="list-style-type: none"> •Silicon Laboratories •Cypress Semiconductor •LAPIS Semiconductor •Texas Instruments •NXP Semiconductors 	<ul style="list-style-type: none"> •Toshiba •STMicroelectronics •Infineon Technologies •Renesas Electronics
Target board interface	JTAG/SWD (1.65V~5.5V)	
External dimensions	102mm(W)×49mm(D)×22mm(H)	
Target power supply	3.3V or 5.0V (± 5%), Max 200mA (with overcurrent protection circuit)	
Control equipment terminals	<ul style="list-style-type: none"> •Write start (input to FP-10) •Write progress (output from FP-10) •Result (output from FP-10) 	
FP-10 power supply	5V DC, 250 mA. (Supplied with AC adapter or USB connector)	
Package contents	FP-10 unit, AC adapter, USB cable for PC, C-Flash software CD	

Specification of C-Flash (the included software)

Operations	Write, Erase check, Checksum, Read, Cancel protect/security before write, set protect/security after write, support for operation on multiple areas of internal flash memory (depending on the CPU)
Supported file formats	Binary, Motorola S, Intel Hx, ELF/DWARF2
TCP/IP control functions	Control C-Flash by issuing commands (Eg: Write) from external programs using TCP/IP
Using multiple FP-10 units	Max 10 units can be connected to a host PC
Operating environment	Windows 7 / Windows 8 / Windows 10 Host PC with USB
User support	Free C-Flash functionality and feature updates * Note: To add new CPUs, license needs to be purchased separately.
Command prompt version	Change Write address and data using the command prompt version
