

FP-10 model PS

New!!

Next generation: Original FP-10 features + added functionalities

What's new?

Power supply feature

Eliminate target power source, supply power directly from FP-10 model PS.

Use FP-10(model PS) to supply power to the target instead of using a separate target power source. Disconnect/connect the target quickly as there is no need to remove/connect the power supply.

Time saver! Speed up the production process!

Specification

Supply voltage : 3.3V or 5.0V (± 5%)
 Maximum current : 200mA

Plus point Overcurrent protection function

If an overcurrent flows due to short circuit of the target etc., the protection circuit shuts off power to FP-10 and stops power output to the target.
